

<div>Josh Bennet</div> <div><div> Southern England</div><div> (+44) 07444 514053</div><div> joshbennet0@gmail.com</div></div>		As a resourceful and adaptable full-stack developer, I am driven by a strong desire for continuous learning. I developed my expertise at iO Academy through rigorous coursework and practical projects, laying a solid foundation for my software development skills. During my tenure at Enable, I gained invaluable hands-on experience that enriched my skills, ultimately shaping me into a confident and proficient professional.

PHP		Education	
Slim, OOP, MVC		<div><div>iO Academy</div><div>Full Stack Track Software Development Bootcamp</div><div> https://io-academy.uk/courses/full-stack-track/</div></div> <div>PHP, HTML, CSS, SCSS, JavaScript, SQL, NodeJS, React, TypeScript, MongoDB, OOP, MVC, Git</div>	
JavaScript		<div><div>Marist College, University in New York, USA</div><div>BSc, Business Administration (Marketing concentration & Advertising minor with Business Strategy)</div><div></div></div> <div>(03/2013 - 03/2017)</div>	
React, Node, TypeScript, jQuery		<div><div>Education First International Academy, New York, USA</div><div>US High School Diploma</div><div></div></div> <div>(03/2011 - 03/2013)</div>	
HTML		Projects Completed Prior to Work	
CSS		<div><div>Email Client front-end</div><div>React app that consumes an existing API</div><div> https://github.com/iO-Academy/2022-jul-penguin-mail</div></div> <div>Utilised React to construct an email client based on specifications, integrating with an existing API. Employed Scrum methodology for project management. Ensured high code quality through peer reviews and Git for version control. Developed visual experience using Bootstrap based on high-fidelity wireframes provided by the product owner. Utilised CSS and HTML alongside Bootstrap, occasionally extending beyond Bootstrap for customization.</div>	
Scss, Bootstrap		<div><div>Social media platform</div><div>OOP Listing App in PHP</div><div> https://github.com/iO-Academy/2022-jul-icepace</div></div> <div>Focused on generating high-quality code and adhering to sound architectural patterns using PHP for a social media platform. Initiated with Agile planning to create a robust wireframe and app architecture. Implemented thorough validation and sanitisation on the sign-up page to guard against hazardous inputs and HTML tags. Embraced OOP and SOLID principles throughout the project.</div>
